

Cisco Chooses GroupSAT as its Distributor in Afghanistan said Nasir Ameeriar

GroupSat announced today that it has acquired a partnership with Cisco Systems.

([PRWEB](#)) August 11, 2005 -- GroupSat announced today that it has acquired a partnership with Cisco Systems. Cisco has selected GroupSat to provide distribution of its networking and telecommunication solutions to complement its world wide distribution offering. Together, GroupSat and Cisco will enable enterprises to in Afghanistan and in the Middle East to optimize their network by using Ciscos state of the art networking equipment said Nasir Ameeriar president of GroupSat Inc. GroupSat networking services can create a secure, high-speed metro or wide area network that connect any points where we provide services. Businesses today need high speed, reliable, cost effective communications to handle the ever emerging international markets - and GroupSat supplies just that. That helps you control your costs and simplify the management of your own network. Plus, bandwidth changes can be made quickly and without hardware or software upgrades.

We also offer Carrier-class configurations of point to point and Internet to meet the varying connectivity needs of ISP, carrier and large enterprise customers. All of our networking services are available to connect locations where once thought to be unreachable. With a wide variety of very flexible packages tailored to the precise business requirements that we've identified in working with our clients, partners and experts in the domain in well over fifteen years in the communication industry in North America and European, we know what you need - and our services will make a serious competitive difference to your efficiency. We provide solutions based on our wide product mix.

We offer VSAT networks, digital services, and Video and Audio services; of course, high speed, always-on, broadband Internet anywhere and anytime you need it. Just tell us the bandwidth and we will deliver.

About GroupSat Inc. FZCO:
